Brian Xu

♥ Providence, RI ☑ brian@brian-xu.com 🔗 brian-xu.com in brian-s-xu 🗘 brian-xu Education _____ **Brown University**, Computer Science Sept 2024 - May 2026 • Coursework: Seminar in Computer Vision for Graphics and Interaction BS University of California, Irvine, Computer Science Sept 2019 - Dec 2022 • GPA: 3.88/4.0 • Coursework: Machine Learning and Data Mining, Introduction to Probabilistic Graphical Models, Introduction to Optimization, Computational Photography and Vision, Project in Computer Vision Research Experience _____ Brown University, Graduate Student Researcher Sept 2024 – present • Conducting research on 3D reconstruction methods in low-light environments. Experience _____ Meta Platforms, Inc., Software Engineer Intern Burlingame, CA June 2022 – Sept 2022 • Improved the speed and scalability of a data annotation pipeline. 3 months Increased annotation speed by integrating computer vision models for machineassisted annotations. • Reducing data footprint by over 80% through efficient caching. • Redesigned database to better integrate with internal data visualization tools. Amazon.com, Inc., Graduate Student Researcher Seattle, WA June 2021 - Sept 2021 Created a progressive web app to handle the user registration process. 3 months • Implemented ML/CV models to process information from user-uploaded images. • Designed a robust and scalable backend with the Spring Framework. • Created and deployed server endpoints to handle sensitive user information. Projects _____ HyP-NeRF: Learning Improved NeRF Priors using a HyperNetwork brian-xu/HyP-NeRF 🗹 • Partial implementation of a research paper, building on the author's reference implementation. Original contributions include extending the model to generate NeRF models conditioned on input text and images through usage of CLIP embeddings. Inverse Graphics GAN: Learning to Generate 3D Shapes from Unstructured brian-xu/IGGAN ☑ 2D Data • Implemented and trained a neural network that learns a distribution of 3D models from 2D images, based on a research paper.

• Built an efficient data pipeline to enable model training.

Visual Computing @ Brown, Software Engineer Intern • Attended NECV2024 @ Yale University Artificial Intelligence @ UCI, Student Mentor • Organized and planned quarterly meetings. • Designed and taught machine learning workshops to students. • Led club presentation for university hackathon and judged student projects. Workshops and Presentations RenderNet: 3D Voxel Rendering with Deep Convolutional Networks • Artificial Intelligence @ UCI

PIFuHD: Image-Based 3D Human Shape Estimation
• Artificial Intelligence @ UCI

HackUCI - Supervised Learning with Online Datasets

Fundamental Machine Learning / Data Science Tools Nov 2020

Jan 2021

Jan 2021

• Artificial Intelligence @ UCI

• HackUCI 2021

BERT: Bidirectional NLP with Transformers May 2020

• Artificial Intelligence @ UCI
